

Tisztelt Társasági Tagok!

Most érkezett egy felhívás egy pétervári konferenciára idén október 2-4 között, melyet mellékelek. A konferencia címe: "Agrophysics Trends: from actual challenges in arable farming and crop growing towards advanced technologies". Az előzetes levél szerint február 25-ig várnak absztraktokat előadásra/poszterre.

További részletekkel a szervezők tudnak szolgálni.

Üdvözlettel:
Bakacsi Zsófia

Dear Colleagues,

with this letter we invite you to participate in the 2nd International Conference "*Agrophysics Trends: from actual challenges in arable farming and crop growing towards advanced technologies*" devoted to the 90th Anniversary of Academician Eugene Ermakov. The Conference will take place at the Agrophysical Research Institute, Saint Petersburg, on 2-4 October 2019. The Organizing Committee would encourage papers on the following topics:

- Crop production management: physiology, genetics, biophysics and breeding of plants, bio- and nanotechnology.
- Advances in soil agrophysics.
- Soil fertility management and land quality assessment under climate change.
- Mathematical modeling, information technologies, precision agriculture: from soil and crop sensing to data management and decision support systems.

Abstract submission deadline is **February 25th, 2019**.

Full paper submission is **June 1st, 2019**.

Abstract submission and pre-registration of participants is through an e-mail agrophys.inst@yandex.ru

The objective of the Conference is to provide the interdisciplinary and creative scientific environment for discussing new ideas on innovative and multidisciplinary research related to crop production, soil quality and management, information technologies in agriculture.

We hope to meet many of yours at this biennial event for current and future discussions.

Best regards,

On behalf of the Organizing Committee
Dr. Svetlana Blokhina
